# REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

After a careful re-reading of the instant specification and the instant claims, the claims were deemed allowable because the claims are drawn to SEQ ID NO:1 and 2, which are the nucleotide and corresponding protein of *Alteromonas fortis* iota-carrageenase. Part (c) of claim 1 states that the HCA score "with the iota-carrageenase of *Alteromonas fortis*...is greater than or equal to 65%...of the amino acid sequence of *Alteromonas fortis* that is SEQ ID NO:2", and claim 13 and 14 limit the HCA scores to equal to or greater than 70% and 75%. Since SEQ ID NO:2 is the same as the iota-carrageenase of *Alteromonas fortis*, they have HCA scores that are 100% identical since they are the same protein. Claim 17 is simply using the gene of SEQ ID NO:1, which was deemed allowable in US patent 6,333,185, to transform a host cell, isolating the iota-carrageenase and using it to produce iota-carrageenans. Iota-oligocarrageenans of the previous claim 17 and iota-carrageenans of the instant claim 17 are simply obvious variants of each other. The former indicates that the length is relatively short whereas the latter does not indicate the length of the saccharide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
